

Increasing the dose of upper limb therapy? Evening lecture

SPEAKER

Ulrike Hammerbeck
PHD, MCSP

Research fellow
Manchester University

Ulrike completed her PhD investigating learning mechanisms in chronic stroke survivors at the Institute of Neurology, University College London under Prof. John Rothwell, in 2015. She has since been awarded a Stroke Association post-doctoral fellowship in which she will investigate proximal arm recovery processes in the acute period after stroke.

TITLE: Increasing the dose of upper limb therapy?

DATE: 1st March 2018. Lecture starts 6pm

VENUE: Seminar room 2, Mayo Building,
Salford Royal Hospital,
Stott Lane. M6 8HD

Parking available at Stott Lane East Car Park

COST: £2 ACPIN members
£5 Non members

OVERVIEW: Ulrike is interested in recovery mechanism of function after neurological insult. Her research investigates the effect of training not only on the control of movement but also on cortico-spinal connectivity. This evening lecture will cover recovery processes and prognostics in upper the limb and specific interventions and application.
